

Automotive Aftermarket Catalog

Petra Oil Company, Inc.

Headquartered in Houston, TX,
the energy capital of the world!

Petra Oil Company, Inc. has extensive experience in the automotive industry. From service products and programs to finance and front end sales, we know the automotive business.

Petra Oil Company, Inc. was founded on the principle of manufacturing top-quality products with innovative programs and unprecedented training to deliver to our customers unmatched service, results and consumer loyalty.

Fuel System Service

Get your vehicle performance back with Petra's Fuel System Service.

Why?

Carbon deposits build up in your fuel system over time and cause your vehicle to lose power, run less efficiently and reduce the performance your vehicle had when it was new.

With Petra's Fuel System Service your vehicle will be restored to "like new" performance. Your vehicle's injectors, valve, combustion chamber and throttle body will be cleaned. This service will help eliminate rough idle and decrease emissions and hesitation problems.

Petra's Fuel System Service also helps clean GDI and EGR carbon buildup.

Brake System Service

Another way you can help keep your vehicle safe is with Petra's Brake Fluid Service.

Why?

If you have a high level of moisture in your brake fluid it could lead to a sluggish brake system, corrosion of components and even brake failure. It's about safety!

On a regular maintenance schedule, have your brake system fluid exchanged with Petra's Brake Fluid Service. Petra's brake service will exchange your brake fluid with new fluid that exceeds federal brake fluid specifications. This service will remove moisture, condensation and air from the brake system. This service helps extend the life of brake system components.

Cooling System Service

Take care of your vehicle's cooling system with Petra's Cooling System Service.

Why?

According to the Department of Transportation, the number one reason for mechanical breakdowns on the highway is cooling system failure.

Some automotive repair shops simply drain what is in your vehicle's radiator, but what about the fluid in the engine and hoses? With Petra's Cooling System Service your vehicle's cooling system will be serviced completely. Petra's service will exchange your fluid, clean your cooling system, remove rust and scale deposits, restore coolant flow, prevent cooling loss and prevent leaks.

UNIVERSAL COOLING SYSTEM CLEANER

PART NO. 4001

Oil Change Service

Take Care of your Engine with Petra Premium Oil Change.

Why?

Detergents in oil can break down and cause sludge and varnish inside your vehicle's engine. When this occurs, it can cause your vehicle to run less efficiently and damage the engine. The more sludge is in your engine the harder your engine has to work. Why would you put new oil into a dirty engine?

With Petra's Premium Oil Change Service, your vehicle will be cleaned internally, with the same type of detergents found in synthetic oil. We will clean the engine prior to an oil change, safely removing sludge and varnish build-up, improving circulation of oil and promoting a more complete drainage of the old oil. Petra's service helps prevent premature sludge and varnish build-up, to maintain a better fuel economy and to provide long-lasting engine protection.

Automatic Transmission Service

Get a Petra Premium Transmission Service today. Your car's transmission deserves it.

Why?

A typical transmission drain and fill only gets 40%-50% of the old fluid out. That's like changing only 1/2 of the oil in your engine when doing a regular oil change. You wouldn't do that to your engine, and you shouldn't do it to your transmission. Sludge and varnish build-up in your transmission can cause transmission failure.

It is important to maintain your vehicle's transmission on a regular maintenance schedule. Petra's Transmission Service will clean internal transmission components, remove internal sludge and varnish, replace 95% of the fluid, revitalize seals and extend transmission fluid life.

Air Conditioning Service

Bring your A/C back to life with Petra's Air Conditioning Service.

Why?

It only takes a simple A/C compressor problem to bring your car's A/C system to its demise. Many of the problems that can occur in your auto A/C system can be connected with the loss of refrigerant which could lead to compressor failure. How about that smell? Did you know that mold and mildew can build up in your vehicle's A/C evaporator causing your air to smell? When was the last time you serviced your vehicle's A/C system? With Petra's A/C products and services, we can detect leaks, lubricate the system, and even eliminate odors caused by mildew, mold and bacteria.

Protect your vehicle's components with Petra Oil's Product Limited Lifetime Warranty

Two coverage levels, one is right for your vehicle...

Platinum Level:

The first qualifying service must be performed at or prior to 40,000 miles / 64,000 kilometers as shown on the unaltered odometer of a qualifying vehicle, serviced by a qualified technician at a qualified repair shop/professional installer.

The warranty is in effect 500 miles after qualifying service is performed.

The maximum benefit provided for vehicles qualifying under the "Platinum Level" is limited to \$5,000.00 USD.

See your local dealer for details.

Gold Level:

The first qualifying service must be performed between 40,001 miles / 64,000 kilometers and 80,000 miles / 129,000 kilometers as shown on the unaltered odometer of a qualifying vehicle, serviced by a qualified technician at a qualified repair shop/professional installer.

The warranty is in effect 500 miles after qualifying service is performed.

The maximum benefit provided for vehicles qualifying under the "Gold Level" is limited to \$2,000.00 USD.

See your local dealer for details.

All services covered for LIFETIME!*

*See your service technician for complete program details and specific information.

Posters

Power Steering Service

Prevent your power steering from causing noise or hydraulic failure. Maintain it by having a Power Steering Service performed every 2 years / 30,000 miles.

Cooling System Service

According to the Department of Transportation, the number one reason for mechanical breakdowns on the road is cooling system failure. When was the last time you serviced your vehicle's cooling system? With Petra's cooling System Service, we completely service all of your cooling system, not just the radiator. Don't be a statistic, service your vehicle's cooling system every 2 years / 30,000 miles.

Premium Transmission Service

Why that a typical drain and fill transmission service only changes the old ATF out of the transmission? It's like only changing the oil in your engine without changing the oil filter. You wouldn't do that to your engine, would you? Don't do it to your transmission. Service your vehicle's transmission every 30,000 miles.
