

Petra Battery Terminal Protector Pads

PN 9004B Specification Sheet

Product Description:

Petra Universal Battery Pads are formulated to prevent battery acid from forming on your vehicle's battery post. Acid which causes corrosion can develop due to, but not limited to; time, battery leaks and heat/weather.

When acid builds up it could cause corrosion. This product is designed to prevent the corrosion from forming on the terminal of the vehicle's battery which could cause the battery to lose its charge, causing the vehicle to not start.

Advantages & Uses:

- Prevents corrosion
- Helps keep battery connection clean to maintain charge

Features:

- Universal pads: works on side or top battery post
- Prevents acid/corrosion on battery post
