

Petra Synthetic Dot 4 Brake Fluid

PN 6464 (64oz) Specification Sheet

Product Description:

Petra Synthetic Dot 4 Brake Fluid is formulated as a high quality glycol ether fluid. It is engineered for all disc and drum type brake systems which call for Dot 4 and Dot 3 performance. This premium quality product exceeds the requirements of Chrysler and General Motors.

Advantages & Uses:

Petra Synthetic Dot 4 Brake Fluid is especially suitable for modern vehicles and the thermal demands put on brake fluids – increasing operating temperatures due to front wheel drive and aerodynamic body designs which reduce airflow.

Features:

- Minimum dry boiling posing exceeds 465^o F
- Minimum wet boiling point exceeds 311^o F
- Meets FMVSS 116, SAE J-1703 and Federal Specifications VV-B-680C
- Compatible with rubber components
- Prevents seal hardening or softening
